

CHINTALA MAHINDRA

Java Backend Engineer | Spring Boot | Microservices | AI Application Integration
+91 96181 12357 | chintalamahindra163@gmail.com | [LinkedIn](#)

SUMMARY

Java backend engineer building secure Spring Boot microservices with REST APIs, Spring Security, and event-driven systems. Hands-on experience integrating practical AI capabilities—RAG, embeddings, LLM APIs, and controlled backend access—using Spring AI within existing Spring Boot applications.

TECHNICAL SKILLS

Languages: Java 21, SQL

Backend: Spring Boot 3, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT, RBAC

Databases & Messaging: PostgreSQL, SQL Server, Redis, Apache Kafka, pgvector

AI Application Integration: Spring AI, RAG, Embeddings, Vector Search, LLM APIs, Prompt Engineering, Structured Outputs

Cloud & DevOps: AWS (EC2, RDS, S3, IAM, CloudWatch), Docker, CI/CD, Git, Maven, OpenAPI/Swagger

PROFESSIONAL EXPERIENCE

Tata Consultancy Services

Aug 2024 – Present

Software Engineer – Java Backend | Hyderabad | Enterprise HRMS & Finance Microservices

- Developed and enhanced Spring Boot 3 microservices on Java 21 supporting payroll, workforce, and finance-related workflows, with REST APIs and Spring Data JPA across PostgreSQL/SQL Server.
- Implemented Spring Security with JWT authentication and role-based access control (RBAC) across employee, HR, and administrative endpoints.
- Integrated Apache Kafka for asynchronous event processing and Redis caching for high-frequency payroll and attendance lookups.
- Integrated Spring AI into existing Spring Boot services for document- and policy-based Q&A using retrieval and embeddings, with application-level access controls applied to retrieved context.
- Supported production debugging, API and database issue resolution, and ongoing enhancements across backend services in Agile delivery.

PROJECTS

Digital Library Platform

2025 – Present

Spring Boot 3, Java 21, React.js, PostgreSQL, Redis, Docker, AWS

- Built a Spring Boot digital library platform with REST APIs, Spring Data JPA, Flyway migrations, and role-based workflows for readers, vendors, and admins.
- Implemented JWT authentication, Redis caching, and S3 storage for book files with SES/SNS notifications.
- Containerized with Docker Compose and deployed on AWS EC2 using GitHub Actions CI/CD.

PolicyDocs RAG Service

2025 – Present

Spring Boot 3, Spring AI, Java 21, PostgreSQL + pgvector, Redis, Docker, AWS

- Built a Spring Boot + Spring AI document service supporting document ingestion, chunking, embeddings, and RAG-based Q&A over policy documents.
- Implemented pgvector semantic retrieval, conversation context, and structured outputs; secured APIs with JWT and RBAC so retrieval is constrained by application-level access controls.
- Containerized with Docker and deployed on AWS EC2; focused on grounded responses and application-level access control rather than open LLM access.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services, 2024

Spring Boot 3 and Spring Framework 6 — Udemy (Chad Darby), 2025

REST API Design, Development and Management — Udemy, 2024

EDUCATION

VIT Vellore

2020 – 2024

Bachelor of Technology – Electronics and Communication Engineering
